

## Canada to Upgrade Portugal's P-3C Orion Patrol Aircraft

2026 - 03 - 11 - [thedefensepost.com](https://thedefensepost.com)

Canada has signed a government-to-government contract to modernize five Portuguese Air Force P-3C Orion maritime patrol aircraft. Managed by the Canadian Commercial Corporation, the 39-million Canadian dollar (\$28.7 million) deal will see General Dynamics Mission Systems (GMDS) Canada upgrade the aircraft to extend their service life and enhance Portugal's contribution to NATO operations.

The program builds on a 2022 modernization agreement covering Portugal's initial P-3C fleet and is expected to support up to 50 roles in Canada's defense and aerospace sector. The P-3C Orion serves as a core

platform for Portugal's maritime patrol operations, including anti-submarine warfare, intelligence, surveillance, reconnaissance, and search and rescue missions across the Atlantic.

Canadian International Trade Minister Maninder Sidhu said the project reflects growing defense partnership between the two countries. "This modernization initiative deepens our bilateral trade and defence relationship while advancing Canada's commitment to closer cooperation with European Allies," Sidhu said. "By contributing Canadian expertise and innovation, we are strengthening...

## Typhoon Spotted Loaded With Rocket Pods for the First Time

2026 - 03 - 06 - [theaviationist.com](https://theaviationist.com)

An RAF Typhoon was pictured at BAE Systems Warton carrying two seven round LAU-131 rocket pods, which can be used to fire APKWS guided munitions against surface and, importantly, air targets.

The images, taken by Tech Digital Photography, mark the first time that we've seen a Typhoon outfitted with a rocket pod in the flesh. While rocket pods were integrated with many aircraft that the Typhoon has ended up replacing, until relatively recently these were largely for unguided rockets in an air to surface role and deploying such a non-precision weapon from a fast jet no longer aligned with the operating practices of many air forces.

Now, though, the introduction of the BAE Systems Advanced Precision Kill Weapon System II (APKWS II) guidance kit for Hydra 70 rockets over the past decade has granted such munitions a new lease of life. Initially envisaged as a way to precisely strike softer...

## Terma Enhances Aircraft Protection for Franco-German C-130J Squadron

2026 - 03 - 12 - [www.terma.com](https://www.terma.com)

Terma is pleased to announce the delivery of new advanced defensive capabilities to the Franco-German Binational Air Transport Squadron (BATS), enhancing the protection of the Squadron's fleet of C-130J-30 aircraft.

This upgrade reinforces Terma's commitment to providing scalable and adaptable protection solutions for allied air forces. The core of the Aircraft Survivability Suite is Terma's Defensive Aids Controller (DAC), which has been integral to the aircraft's defensive systems since its inaugural flight in 2021. At that time, Terma integrated the Missile Warning System (MWS) and countermeasures dispenser system.

The integration of the Leonardo Miysis Directed Infrared Countermeasure (DIRCM) system into the DAC will enhance the aircraft's ability to defend against infrared-guided missile threats. The DAC coordinates sensor inputs and automates countermeasure responses, ensuring real-time...
