

Dassault goes it alone on Rafale F5, eyes exports from 2035

2026 - 08 - 27 - www.aerotime.aero

Dassault Aviation is developing the Rafale F5 standard without a foreign co-development partner and does not expect to offer the aircraft for export before 2035. "We are working today on this super Rafale, which we call the Rafale F5," Dassault Chairman and CEO Eric Trappier told BFM Business.

"It is a request from the French armed forces." Asked about the schedule, Trappier said the aim was to "be ready for 2033, 2035." "There is no co-development with foreign countries today," Trappier said. "On the other hand, it is a standard and an aircraft, because the aircraft will be developed a little further, that we will be

able to offer for export from 2035."

France has been carrying the F5 bill alone since co-financing talks with the United Arab Emirates collapsed in December 2025 over technology transfer terms. Abu Dhabi had been reportedly prepared to contribute up to €3.5 billion (\$3.8 billion).

Trappier renews single-prime case after FCAS split The F5 became France's priority combat air program after Berlin and Paris ended the manned fighter component of the Future Combat Air System (FCAS) in June 2026, following the failure of Dassault and Airbus to agree on industrial...

India's Super Sukhoi Su-30MKI to become a stealth jet hunter with new AESA radar

2026 - 08 - 18 -

aerospaceglobalnews.com

India is preparing to give its Su-30MKI fleet a new set of eyes, built for an air battle increasingly shaped by stealth fighters, long-range missiles and electronic warfare. At the heart of the transformation is Virupaksha, a large indigenous active electronically scanned array (AESA) radar being developed by the Defence Research and Development Organisation's Electronics and Radar Development Establishment (LRDE).

A DRDO official told Aerospace Global News that the radar has been designed specifically for the Indian Air Force's Su-30MKI upgrade and will replace the fighter's Russian-origin NO11M Bars passive electronically scanned array radar. For India's largest fighter fleet, that is a fundamental change. The Su-30MKI has size, range and an increasingly formidable weapons load, but its existing radar belongs to an earlier generation. Virupaksha is intended to give it much sharper eyes,...

Retired Luftwaffe C-160s to return as 14-ton firefighting aircraft

2026 - 08 - 16 -

www.airdatanews.com

According to German aviation magazine Flug Revue, the first aircraft has already been allocated the civil registration D-AMJT. The project is being conducted with the involvement of Germany's Federal Aviation Office (LBA) and the Bundeswehr's Federal Office of Bundeswehr Equipment, Information Technology and In-Service Support (BAAINBw).

The aircraft will use a firefighting system developed by Australian company Helitak Firefighting Equipment. A tank installed inside the Transall's cargo compartment can carry around 14 tonnes of water or fire retardant. Instead of releasing the load through the aircraft's large rear cargo ramp, the system discharges it through the underside of the fuselage, close to the center of gravity. The arrangement can release up to 3,000 liters per second, according to information provided to Flug Revue. TAS Managing Director Maren Reese...

La Direction générale de l'armement (DGA) a procédé, le 30 juillet 2026, à la livraison du premier hélicoptère NH90 Caïman Standard 2 au profit des forces spéciales de l'armée de terre. Cette évolution du NH90 Caïman va doter les forces spéciales de nouvelles capacités d'intervention adaptées à leurs missions, sur tous les types de théâtre. La DGA a commandé, via l'agence Nahema de l'Otan, 18 hélicoptères...

Bell Awarded Contract for SPINE Upgrades to H-1 Fleet

2026 - 07 - 27 - news.bellflight.com

Bell Textron Inc., a Textron Inc. (NYSE: TXT) company, has announced an estimated \$300 million, firm-fixed-price, fixed-price incentive, and cost-plus-fixed-fee contract from the Department of Navy. This base plus three option years contract provides the Structural and Power Improvements for NextGen Effects (SPINE) upgrades on up to 49 U.S. Marine Corp AH-1Z Viper and UH-1Y Venom aircraft. Known as...
